

## Blade® Inductrix FPV BNF & RTF

The perfect beginner FPV drone designed for indoor flying in even the smallest of places, the Blade® Inductrix® FPV drone is an ultra-micro marvel. You get out-of-the-box FPV performance with a pre-installed 25mW micro FPV system and a 4.3 inch FPV external monitor which can easily be upgraded to FPV goggles. Four specially tuned Electric Ducted Fan rotor systems give this modern quad the appeal of a jet. As a result, performance feels incredibly smooth with far less noise than a conventional propeller rotor system. Durable rotor housings inherently prevent damage whether it's bumped into walls or falls into the grass. Brilliant LED orientation lights and a sleek body design help keep you going in the right direction. Innovative SAFE® technology with self-leveling makes staying in control easy, even if it's your first flight.

### SAFE Equipped:

SAFE technology enables consistently smooth flight and offers a flight experience in a micro sized quadcopter that is unmatched. This makes flying FPV for the first time, and every time, easy and enjoyable.

### FPV equipped:

25mw micro FPV system is pre-installed so you can be flying in even the tightest of places immediately after charging the battery

### 4.3 inch FPV Monitor Included

This FPV monitor can clip right on top of the transmitter offering, out of the box FPV performance with a clear upgrade path to goggles should the user want to. Monitor can select all 40 FPV channels and is compatible with all 5.8GHz FPV transmitters.

### LED Lighting

Brilliant LED lights provide instant orientation reference when flying line of sight. The clear rotor housings keep your view unobstructed and add an unmistakable glow to the airframe.

### Quiet Ducted Fans

Four carefully-tuned electric ducted fans give the Inductrix™ drone smooth performance that produces far less noise compared to normal quads that use traditional propellers for thrust. Improved motors offer more punch when you need it, without sacrificing efficiency. The stealthy result is a machine that's less intimidating with the appeal of a jet aircraft.

### Improved motors and Batteries

To accommodate the weight of the FPV camera system, the Inductrix FPV offers new, high performance motors and a larger 200mAh battery. This makes the micro-FPV experience feel much more responsive along with offering better flight time.

### Sleek Body

A new, vibrant yellow canopy fully encases the FPV camera and video transmitter while maintaining a sleek profile. Along with the colored propellers, this micro machine easily stands out from the pack.

### USB Charger

The included E-flite® USB charging unit operates from any convenient 5.0V USB port and can have the included 200mA

h 1S 3.7V Li-Po flight battery recharged in a matter of minutes.

## INCLUDED INSIDE THE BOX

### RTF:

Blade Inductrix FPV quadcopter  
Blade MLP Transmitter  
Transmitter clip mount  
Spektrum 4.3in FPV Monitor  
E-flite 200mAh 1S LiPo Battery  
E-flite 1S LiPo USB charger

### BNF:

Blade Inductrix FPV quadcopter  
E-flite 200mAh 1S LiPo Battery  
E-flite 1S LiPo USB charger

## STANDARD PRICING

Item #	Retail
BLH8500 RTF	\$219.99
BLH8580 BNF	\$114.99
SPMVM430HA Headset Adapter	\$64.99
